

VICTOR ALFONSO ROBERTO SEVILLANO MACURI

Data Engineer – Mechatronics Engineer

Madrid, Spain - 611910878 | victor.sevillanom@protonmail.com | [linkedin.com/in/victor-sevillanom/](https://www.linkedin.com/in/victor-sevillanom/)

PROFILE Data Engineer with experience in ETL/ELT process optimization and cloud migration in Big Data environments. Specialized in Microsoft Azure and PySpark, with skills in data modeling, distributed processing and technical team leadership.

WORK EXPERIENCE

- NTT Data**

Business & Technology Consultant – Internship associated with Master’s in Fintech

Madrid - Spain
Mar. 2026 – Present

 - Structuring technology roadmaps and timelines for digital transformation projects in the Insurance sector, ensuring alignment between technical milestones and business objectives.
 - Developing technical-financial analyses and essential documentation for the implementation of large-scale IT solutions.
- Management Solutions – Assigned to the Credit Bank of Peru**

Data Engineer

Lima – Peru
Sep. 2023 – Aug. 2025

 - Successfully migrated data transformation processes from On-Premise to Azure Databricks and Azure Data Factory, improving scalability and efficiency for Peru’s leading bank.
 - Refactored existing ETL/ELT pipelines with SQL and PySpark to meet new requirements, ensuring compliance with data quality, security, and traceability standards.
 - Optimized cloud based ETL/ELT performance, reducing processing time by 80% and a significant decrease in operational costs through distributed processing, improved data ingestion, and optimized storage.
 - Led a data validation team, implementing audit mechanisms to ensure accurate and lossless migration.
- Pontificia Universidad Católica del Perú – IT Department**

Data Engineer

Lima – Peru
Aug. 2022 – Jun. 2023

 - Designed and implemented an On-Premise database optimized for inventory management, ensuring a scalable solution aligned with the department’s operational costs.
 - Developed Python applications integrated with the database, incorporating Optical Character Recognition (OCR), web scraping, and graphical interfaces to automate inventory tracking and management.
 - Implemented a data analysis system for inventory optimization, reducing obsolete equipment by 90% through automated redundancy detection and improved asset management processes.
- DT Technical Solutions**

Data Engineer Jr.

Lima – Peru
Jan. 2022 – Jul. 2022

 - Automated Azure cloud infrastructure deployment using Terraform, ensuring consistent environments across teams.
 - Developed and optimized ETL pipelines with Azure Databricks and SQL for fleet maintenance data integration.
 - Improved data quality and traceability through validation checks and structured ingestion processes.

EDUCATION

- Universidad Carlos III de Madrid**

 - Master in Financial Technology – Fintech

Pontificia Universidad Católica del Perú

 - Diploma in Business Analytics
 - Degree in Mechatronics Engineering - Top 10% of the Faculty of Science and Engineering.
- Madrid – Spain**
Sep. 2025 - Present

Lima – Peru
Nov. 2023 – Apr. 2024
Mar. 2018 – Dec. 2022

TECHNICAL SKILLS

Programming & Queries: Python, Scala, R, SQL (T-SQL, Oracle SQL)
Big Data & Cloud: Azure (Data Factory, Databricks, ADLS Gen2), Apache Spark, PySpark
Data Engineering: ETL/ELT design and optimization, data reconciliation
DevOps & Automation : Git, Jenkins (CI/CD), Terraform, RPA
Analytics & ML: Power BI, predictive models, machine learning
Project Tools : Agile (Scrum), documentation

COURSES & CERTIFICATES

Microsoft Azure Fabric Data Engineer Associate DP700
Microsoft Azure Data Engineer Associate DP 203
Microsoft Azure Fundamentals AZ 900
Excel Skills for Business, Macquarie University & Coursera

LANGUAGES

English– CAE C1 | TOEFL 101
Spanish – Native
German – B1
French – DELF B2
